CONTINUUM

BY FLINT

**HIGH PRESSURE LAMINATE
HPL ON TOP
HDF CORE
HDF WATER RESISTANCE
WEAR RESISTANCE (C6)
IMPACT RESISTANCE (IC4)
FIRE RESISTANCE (Bfl-s1)**

CONTINUUM no is not 'JUST' any low pressure laminate; it embodies a superficial 1mm HPL (High Pressure Laminate) layer which grants the highest impact and wear resistance.

The specs that made FLINT famous are preserved: impact, scratching, fire, pressure and wear resistance.

FLINT HI FLOOR's strength in areas where waterproof flooring is not required.

FLINT

HI-FLOOR

**HIGH PRESSURE BLOCK
HPL INSIDE
WEAR RESISTANCE (AC6)
IMPACT RESISTANCE (3 X IC4)
FIRE RESISTANCE (Bfl-s1)
100% WATERPROOF**

FLINT HI-FLOOR embodies HPB technology (High Pressure Block), a unique and patented high pressure and temperature process.

The ultra-compact synthetic block offers a resistance to water, impacts and wear not seen in other products.

FLINT HI-FLOOR is a first consideration for spaces that require 100% water resistance.

THE SAME SURFACE WITH TWO CORES
Strong and easy click system

CONTINUUM FLOORING EXPERIENCE

CONTINUUM + HI-FLOOR

Enjoy a global flooring experience under your feet.

Two technical floorings with different benefits and one single look, for a perfect, continuous and seamless installation.

The same designs with the same textures for a unique incessant view of the architectural space.

CONTINUUM BY FLINT

Living room / Bed rooms / Contract / Retail / Dry spaces

Transition between the two surfaces is invisible.

FLINT HI-FLOOR

Kitchen / Bathroom / Wellness / High traffic / Wet spaces

Key tech.
